Respected Sir/Ma'am,

I am excited to apply for the internship program. Knowing that data-driven decision-making is the best practice after completing my +2 I started exploring more options in the field while simultaneously applying for my bachelor's in business administration from Netaji Subhas University of Technology New Delhi, to become a complete package of a skilled professional. I grew a passion for data analytics as early as I can remember, and after completing my professional certification in data analytics offered by Google I grew a lot of skills and tools.

As a Data Analyst, every stage of analysis is important, I have been working on several projects and even had a chance to be a part of a virtual experience from Accenture. I have worked with a wide variety of software and tools, including BigQuery, R Programming, Kaggle Notebook, MS Office, Tableau, Canva, Visual Studio Code, etc.

I am impressed & I want to explore more in the field while learning and growing with the industry's leading firm and get a chance to work with great individuals and professionals. I am confident I can be a good fit to work on the project of startup ecosystem analysis. I have been interested in learning about start-ups from a very early age and I have learned a very valuable lesson that start-ups are not just businesses rather they are solutions to the bigger problems. I want to go places in my life and want to solve those small but bigger issues from the environment.

Please find my resume attached. Feel free to contact me at aashishsingh7860@gmail.com or +91 8178012845. Thank you for taking the time to consider my application. I hope to hear from you soon.

Sincerely,

Ashish Singh

Data Analyst

BBA in Finance from NSUT, Dwarka ND-04
